Safe Site Access Certificate

The use of this Certificate will:

establish a clear line of communication and mutually agreed criteria for site safety, before the work starts; help to make the work safer by reducing, or removing altogether, the risks arising from poor conditions on site; provide a consistent approach to site safety, by helping all parties to meet their health and safety responsibilities.

The Principal Contractor and the Contractor should jointly complete this certificate, which is in the form of a checklist, before work starts on site. The safety of the site work areas, access routes, etc should be checked at that time, by walking through the areas that the Contractor will have to use. *Both parties must be fully satisfied that the conditions are "safe and suitable for work", before signing the certificate. The Contractor's site representative should have a copy of the completed certificate on site.

The Specialist Engineering Contractors Group represents a sector comprising over 60,000 companies and a workforce of more than 300,00

Contract information Page 1 of 9

Cont	tract Name:					Equipment Type:								
Princ	cipal Contractor:					Escalator		Passeng	er Convey	or \square				
Cont	tractor:					Manufact	turer:		Rise	Step Width				
Site	Address:					Areas of t	he site the co	ontractor will v	work in:					
Job I	No:													
Site o	confirmed as safe and	suitable for work by the prir	ontract	or *		Site accepted as safe and suitable for work by the contractor * This must be re-checked at the time of starting work on the site – see page 3.								
Nam	ne:	Position:				Name:		Position:						
Sign	ature:	Date:	Time:			Signature	:	Date:	Т	ime:				
1	Site Arrival		N/A	NO	YES	Detai	ls / Commer	nts (in general	terms)					
1.1	Are there arrangement induction for workers	nts to conduct site safety new to site ?				\rightarrow								
1.2	1.2 Is there a person appointed for site safety co- ordination?					\rightarrow								
1.3		pecific risks and safety ed been communicated?				\rightarrow								

2	Construction [Design and Management] Regulations [CDM]	N/A	NO	YES		Details / Comments (in general terms)	
2.1	Is the work a notifiable project under the CDM Regulations?				\rightarrow		
2.2	If CDM applies has the a) CDM co-ordinator b) Principal Contractor been appointed?				\rightarrow		
2.3	Has a Health & Safety Plan been submitted to the Principal Contractor?				\rightarrow		
2.4	Have employees received adequate training and information?				\rightarrow		
2.5	Is Form F10 (compulsory for CDM) been displayed by Principal Contractor?				\rightarrow		
3	Access	N/A	NO	YES		Details / Comments (in general terms)	
3.1	Is access to the workplace safe?				\rightarrow		
3.2	Are walkways sound and clear of obstructions?				\rightarrow		
3.3	Has edge protection been provided in line with the Construction Welfare Regulations 1996?				\rightarrow		
3.4	Are holes/voids barried off or protected with covers, and are warning notices displayed?				\rightarrow		
3.5	Is lighting to and from the workplace adequate?				\rightarrow		

4	Ladders	N/A	NO	YES		Details / Comments (in general terms)
4.1	Are access/egress ladders in good condition?				\rightarrow	
4.2	Are all ladders secured?				\rightarrow	
5	Scaffolds and Working Platforms	N/A	NO	YES		Details / Comments (in general terms)
5.1	Is there proper access to the scaffold?				\rightarrow	
5.2	Is the scaffold being inspected every week or after any significant alteration?				\rightarrow	
5.3	Is the scaffold report signed, available and up to date?				\rightarrow	
5.4	Are all uprights, ledgers and braces fully tightened and secure?				\rightarrow	
5.5	Are ALL working platforms fully boarded, all handrails fitted and kickboards in place?				\rightarrow	
5.6	Are intermediate guardrails fitted, if required or will all personnel wear Safety Harnesses?				\rightarrow	
5.7	Are all boards secured down?				\rightarrow	
5.8	Is the scaffold free of any warning notices, e.g. incomplete, danger do not use?				\rightarrow	

6	Cranes and Lifting Equipment	N/A	NO	YES		Details / Comments (in general terms)
6.1	Is the driver of the crane fully trained, competent and over 18 ?				\rightarrow	
6.2	Does the crane driver and banksman know the weight to be lifted ?				\rightarrow	
6.3	Is there an automatic safe load indicator fitted?				\rightarrow	
6.4	Is the Safe Working Load (SWL) marked on all lifting equipment ?				\rightarrow	
6.5	Has all lifting gear been inspected, tested and marked accordingly ?				\rightarrow	
6.6	Is the lifting gear in good condition?				\rightarrow	
6.7	Is there a current test certificate available, and is it in date?				\rightarrow	
6.8	Has the operator of lifting equipment been trained in its use ?				\rightarrow	
6.9	Are all lifting beams in good condition, been tested, certificated and marked with Safe Working Load (SWL), before being put into use ?				\rightarrow	
7	Electrical					Details / Comments (in general terms)
. 7.1	Has an electrical supply been arranged for use	N/A	NO	YES		Dotaile / Commonte (in general terms)
	?	Ш			\rightarrow	
7.2	Is low voltage (110 Volts) temporary supply available for task lighting and portable				\rightarrow	

7	Electrical (continued)	N/A	NO	YES		Details / Comments (in general terms)
7.3	Are Residual Current Devices (RCD) fitted to tools and equipment that operate on 240 volts (only maintenance sites, construction/ modernisation must use 110 volt supply) ?				\rightarrow	
7.4	Have portable appliance tools been tested, certificated and the certificate current?				\rightarrow	
7.5	Is all equipment, wires, and cables free from damage ?				\rightarrow	
7.6	Are all connections to the electrical supply by correctly fitted plugs?				\rightarrow	
7.7	Are the plugs correctly fitted to hold the wiring?				\rightarrow	
7.8	Is there a Permit to Work system in place for electrical works ?				\rightarrow	
7.9	Have precautions been applied for any Live working requirements ?				\rightarrow	
7.10	Can the supply be permanently isolated by locking and tagging out ?				\rightarrow	
8	Fire	N/A	NO	YES		Details / Comments (in general terms)
8.1	Has a fire risk assessment been carried out?				\rightarrow	
8.2	Are suitable fire extinguishers available for use ?				\rightarrow	
8.3	Has the Fire evacuation procedure been explained by the Principal Contractor and evacuation muster points been determined and communicated to workforce?				\rightarrow	

8	Fire (continued)	N/A	NO	YES		Details / Comments (in general terms)
8.4	Are Hot Works Permits in use ?				\rightarrow	
9	Noise Has an assessment been carried out for any	N/A	NO	YES	•	Details / Comments (in general terms)
9.2	excessive noise likely to be created? Are ear protection devices available?				→	
9.3	Have you been informed of any controls in place restricting the noise levels at certain times during the day?				\rightarrow	
	Health - Protective Equipment	N/A	NO	YES		Details / Comments (in general terms)
10.1	Have all hazardous substances been identified ?				\rightarrow	
10.2	Are COSHH Assessment sheets available for hazardous substances ?				\rightarrow	
10.3	Is necessary Personnel Protective Equipment (PPE) available and in good condition?				\rightarrow	
10.4	Is all compulsory protective equipment used, (hard hats, safety boots/shoes) ?				\rightarrow	
10.5	If working at heights of more than 2 metres, are safety harnesses provided?				\rightarrow	
10.6	Has training been given on the safe use of PPE ?				\rightarrow	

11	Manual Handling	N/A	NO	YES		Details / Comments (in general terms)
11.1	Is mechanical handling available?				\rightarrow	
11.2	Can heavy loads be avoided with the use of lifting equipment?				\rightarrow	
11.3	Has a sufficient risk assessment been conducted ?				\rightarrow	
12	Welfare	N/A	NO	YES		Details / Comments (in general terms)
12.1	Are there suitable washing facilities available with warm water ?				\rightarrow	
12.2	Are there adequate toilet facilities?				\rightarrow	
12.3	Are there First Aid facilities available ?				\rightarrow	
12.4	Are there rest room facilities available for eating/drinking?				\rightarrow	
12.5	Are drying rooms available for the drying of clothing?				\rightarrow	

13	General	N/A	NO	YES		Details / Comments (in general terms)
13.1	Is the lighting suitable and sufficient?				\rightarrow	
13.2	Is emergency lighting available in the case of power failure ?				\rightarrow	
13.4	Is work programme of other contractors co- ordinated to avoid danger to all parties ?				\rightarrow	
13.5	Is good housekeeping on site undertaken to avoid hazards ?				\rightarrow	
13.6	Are all Risk assessments and Method Statements available and issued to all				\rightarrow	
13.7	Have all safety precautions been taken for workers working alone or in a confined space?				\rightarrow	
					\rightarrow	

Other site safety issues	Are there any other site safety issues that may affect the work? - These should be listed here	Exceptions	Are there any agreed "exceptions" to the core requirements? - These should be listed here

Site Lighting

For <u>all</u> areas on UK construction sites, SEC Group recommends a standard maintained luminance of between 20 and 50 lux. Where access lighting to these values is not present, the lighting should be considered inadequate and the area should not be accessed until such time as the lighting has been corrected.
