Dear Sir,

## Toggle Switches

I have been advised that a switch of the 'toggle' type has failed in the 'closed' position. I understand this switch type was used extensively prior to the introduction of EN.81 and in particular was used for pit isolation and rooftop isolation control.

In view of the nature of this fault it might be as well for members to double check wherever such equipment is still in use. Should any further information be required in the meantime please contact the Association.

Yours faithfully,

D M Fazakerley  
Director
