RE: TECHNICAL SAFETY BULLETIN
Check of side beams on car sling TCS 25 - crack formation, Manufactured
between 1999-2007

Dear Sir,

Please be advised thyssenkrupp Elevator U.K. would like to use LEIA's Technical Safety Bulletin system to release important safety information, found during our regular inspections of installed elevators, concerning a limited number of lifts that used our TCS25 sling from 1999 to 2007. This relates to our own Evolution range and possibly a few slings supplied for third party equipment.

I have attached full technical information and inspection requirements and would be grateful if you could release this to all our members so that they can perform the required checks. Should a unit be found to have such a defect, our contact details have been provided and thyssenkrupp elevator have a retrofit package that we can supply, free of charge, to rectify the problem.

Health and safety is of paramount importance to us and we would be grateful if you could release the information on receipt of this letter, so that inspections can begin. We apologise to all concerned for any inconvenience caused.

Yours faithfully

A handwritten signature in black ink, appearing to be "A.S. Glover", written over a horizontal line.

A.S. Glover
Quality and Environment Manager
